

# TRANSPORTATION CONCURRENCY

## WHAT IS IT?

Concurrency is the State requirement that transportation improvements and strategies necessary to serve development are built and in place at the time of development, or are financially committed, within six years.

## HOW DOES REDMOND MANAGE IT?

Under Redmond's proposed concurrency management system, the City will adopt regulations that use a "plan-based" approach to maintaining concurrency (Comprehensive Plan Transportation Policies TR-3 & TR-4). The City will be required to ensure that transportation improvements (programs, facilities, and services) are provided "in proportion to the needs of the City and the pace of growth." Concurrency is maintained as long as these improvements are proportionate to, work parallel and are consistent with the Redmond Comprehensive Plan. City staff are preparing draft regulations to implement this proposed concurrency system, and will be available to discuss them with the public.

You are invited  
to attend a community briefing on  
**TRANSPORTATION CONCURRENCY  
MANAGEMENT IN REDMOND**

Wed Sept 26, 2007

5 PM to 7 PM

Redmond City Hall

Council Chambers Conference Room
